Technical Projects

Condotel Booking Database Application | *Feb 2022 – March 2022*
- Analyzed booking requirements of condotel owners
- Designed ER diagram and schema, then normalized all tables to at least 3rd normal form
- Designed GUI using Java Swing and connected it to the MySQL database
- Main functionalities allowed users to add bookings, view bookings, cancel bookings and view employee status at condotels

Calendar Application | *Nov 2021*
- Implemented in UBC's CPSC 210 Software Construction class using Java
- Allowed users to add recurring events and remove events from the calendar, and save and load the contents of the calendar using a JSON file
- Ensured the application worked correctly and had full code coverage using JUnit tests
- Achieved a grade of 100%

UVIC Stem Cell Club Website | *Jan 2021*
- Designed and created the UVIC Stem Cell Club website
- The website is hosted on Azure and was implemented with HTML, CSS, and JavaScript

Work Experience

Granville Island Ferries – Deckhand and Ferry Operator | *Summer 2019-2021*
- Managed dock locations in False Creek by handling ticketing, customer service, and boarding
- Promoted to Ferry Operator in Summer 2020
- Operated a small Ferry boat that transported customers around the False Creek area
- Communicated via radio with other employees to ensure efficient transport of customers

Vancouver General Hospital – Volunteer at Retail store | *Sundays 2018/2019*
- Responsible for opening and closing the retail store, cashiering duties, dealing with customers in a courteous way, and training new staff
- Helped raise money for VGH, and kept the gift shop open for customers inside the hospital
